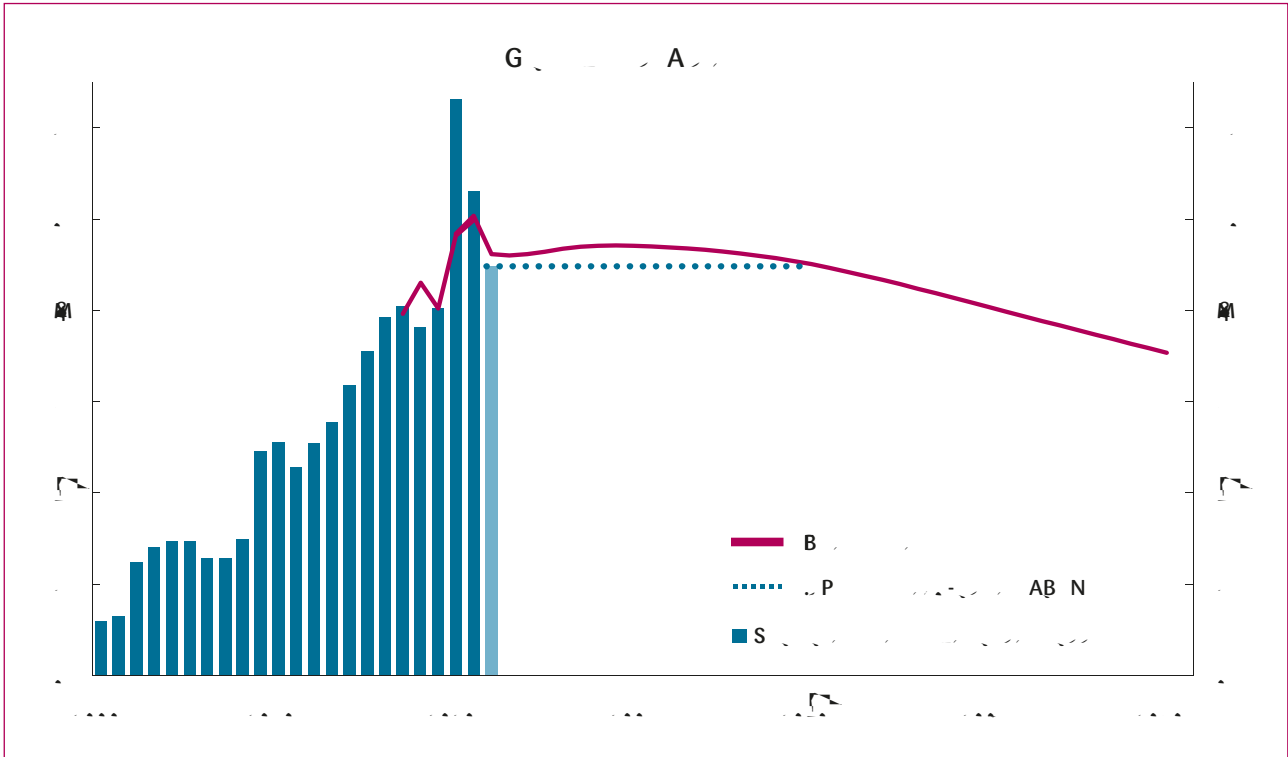

Figure 1: Comparison of the number of publications in the field of AI in the period 2000-2021.

The number of publications in the field of AI has increased significantly over the period 2000-2021. This growth is reflected in the increasing height of the bars in the chart. The data shows a steady upward trend, with a notable increase in the number of publications starting around 2010. The total number of publications in 2021 is approximately 11.0, which is a significant increase from the 1.0 publications in 2000.

The number of publications in the field of AI has increased significantly over the period 2000-2021. This growth is reflected in the increasing height of the bars in the chart. The data shows a steady upward trend, with a notable increase in the number of publications starting around 2010. The total number of publications in 2021 is approximately 11.0, which is a significant increase from the 1.0 publications in 2000. (2010).
